

THANMAI CHOWHAN MUDAVATH

Android Developer Intern | Kotlin Developer | Mobile App Developer | Software Developer Intern

+91 7032341355 | 24wh1a05d0@bvrithyderabad.edu.in | Hyderabad, Telangana | linkedin.com/in/mudavath-thanmai-9808a1328

SUMMARY

Computer Science and Engineering student with hands-on Android development experience using Kotlin, Jetpack Compose, Android SDK, Supabase, SQL, REST APIs, Retrofit, BLE, TensorFlow Lite, OpenCV, Git, and GitHub. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, API integration, authentication workflows, mobile UI design, debugging, and database-backed application development.

TECHNICAL SKILLS

- Programming Languages: Kotlin, Java, Python, C, SQL
- Android Development: Android SDK, Jetpack Compose, Navigation Compose, Material Design 3, Android Studio, Android permissions, BLE, mobile UI
- Backend, APIs, and Databases: Supabase, REST APIs, Retrofit, MySQL, SQL queries, authentication workflows, database design
- AI and Computer Vision: TensorFlow Lite, OpenCV, face verification, image processing fundamentals
- Computer Science: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, API integration
- Developer Tools: Git, GitHub, Gradle, debugging, version control
- Soft Skills: problem-solving, teamwork, communication, analytical thinking, adaptability, quick learning

PROJECT EXPERIENCE

SmartAttendance Android App | Kotlin, Android Studio, Supabase, BLE, TensorFlow Lite, OpenCV

- Built a multi-role Android attendance system for 2 user roles: teachers and students, with OTP-based session control, attendance history, and secure attendance recording.
- Implemented 3-layer attendance validation using OTP session codes, BLE proximity checks, and face verification to reduce proxy attendance and improve identity verification.
- Integrated Supabase backend workflows to store attendance records, manage live sessions, prevent duplicate entries, and support role-based teacher and student dashboards.
- Developed responsive Android screens for live session tracking, attendance marking, attendance history, and smooth navigation between student and teacher workflows.

SheVox Women's Safety Android App | Kotlin, Jetpack Compose, Navigation Compose, Material Design 3

- Developed a multi-screen Android safety app prototype with safety mode, a voice passcode flow, an emergency countdown, trusted contacts, and alert screens.
- Built Jetpack Compose UI and Navigation Compose routing to support fast navigation between emergency workflows and alert actions.
- Added Android permission handling for 5 feature areas: microphone, location, SMS, contacts, and internet, supporting future emergency alert workflows.
- Applied Material Design 3 components to create a consistent, accessible, mobile-first user interface.

Memory Match Game | Java, Data Structures and Algorithms, OOP

- Created a Java memory matching game using collections, turn tracking, matching logic, score tracking, and game state management.
- Applied OOP and DSA concepts to manage cards, user actions, win conditions, and replayable gameplay.

Space Shooting Game | Python

- Built a Python arcade game with player movement, shooting logic, collision detection, score tracking, and replayable gameplay loops.

EDUCATION

BVRIT Hyderabad College of Engineering for Women, Hyderabad, Telangana

Bachelor of Technology in Computer Science and Engineering | Expected May 2027 | CGPA: 8.63/10.0

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

CERTIFICATIONS AND ACHIEVEMENTS

- Oracle Cloud Infrastructure Certified AI Foundations Associate - Oracle University | Oct 2025
- Python Essentials 1 Certification - Cisco Networking Academy and Python Institute | Oct 2025
- AI Agents Intensive Course - Google and Kaggle | Dec 2025
- Hackathon Participant - EurekaHacks by Google Developer Groups (GDG), Noida, UP
- Languages: English, Hindi, Telugu
